Foreword from Vice Chancellor

Assalamualaikum Warahmatullahi Wabarakatuh and Greetings

Congratulations and welcome to the new students and thank you also for the trust you have chosen to be with UTHM to continue your efforts for success in career and well-being in the future.

The world has been shocked by the outbreak of Coronavirus Disease 19 (Covid-19) which until now has not shown any sign that it will end. In order to comply with standard operating procedures issued by competent bodies such as the Ministry of Health Malaysia and the Ministry of Higher Education, UTHM has undertaken various initiatives to curb the spread of epidemics in UTHM. Among the initiatives in the implementation of Learning and Teaching are through online methods namely Full Online Classroom (FOC), Smart Classroom, Flip Learning, Massive Open Online Course (MOOC) and more. Hopefully, continuous efforts at the highest management level and all UTHM staff will be able to prevent the spread of the epidemic and be able to provide a conducive learning environment for all UTHM students.

The year 2019, UTHM continue to move forward in its efforts to become a leader in the field of science and technology education. This is evidenced by the overall rating of 4 stars by QS Stars Rating with 5 out of 7 categories given a 5-star rating namely Teaching, Employability, Facilities, Social Responsibility and Inclusiveness categories. Apart from that, UTHM has also ranked 8th in Malaysia in Webometrics Ranging Web of Universities with 13th place ranking at the university level in the world. Apart from that, UTHM students are also not left behind in winning various awards at the international level as well as making UTHM's name famous at the world level.

Finally, I have full confidence that you will be a successful University citizen and can continue the tradition of University educational excellence. I am also confident that when you graduate, you will become a member of the community who is able to apply the knowledge that will be obtained and be able to contribute services, devotion and expertise for the sake of Religion, Nation and Country.

Good luck.

"WITH WISDOM WE EXPLORE"

Y. BHG. PROFESSOR Ts. DR. WAHID BIN RAZZALY
Vice-Chancellor
Universiti Tun Hussein Onn Malaysia

Foreword from the Deputy of Vice Chancellor (Academic and International)

Assalamualaikum Warahmatullahi Wabarakatuh and Greetings

I would like to take this opportunity to congratulate and congratulate the new students who have been successfully selected to further their studies at Universiti Tun Hussein Onn Malaysia for this 2020/2021 session. Congratulations also to the Center for Academic Development and Training who has successfully published a proforma which will be a guide for students to make learning plans starting from the first semester until graduation at this University.

The Coronavirus Disease 2019 (Covid-19) pandemic has changed the landscape of higher education in Malaysia. The learning and teaching (PdP) process, which was previously face-to-face, had to be changed to an online form of learning to comply with the Standard Operating Procedures aimed at curbing the spread of the Covid-19 epidemic. For Semester 1 Session 2020/2021, UTHM has also encouraged the implementation of hybrid PdP, face to face and online. It is hoped that this effort will reduce the risk of Covid-19 infection, especially to UTHM students and academic staff.

To ensure that the PdP process runs smoothly, UTHM has taken various proactive measures such as providing ICT infrastructure including increasing broadband line capacity, ICT infrastructure and providing online platforms such as Author applications, Google Classroom and e-Portfolio. In addition, UTHM lecturers have also been given training related to the online learning and teaching process to ensure that the teaching process runs efficiently.

I hope with the various initiatives that have been and are being done by UTHM will be able to provide a useful experience to you while exploring knowledge at UTHM. I would also like to call on you to take the opportunity to be at UTHM to explore your potential through various activities and co-curricular programs provided in making you a holistic and balanced student. To achieve the aspirations of UTHM, the initial planning through Proforma will be able to help you plan the journey throughout the study period at UTHM and it is hoped that you will be able to obtain the best results and achieve excellent success.

Finally, I would like to wish Good Luck and pray that you achieve excellent success in your studies at this University and in turn can contribute towards the provision of human capital that will contribute to the development of religion, race and country.

"WITH WISDOM WE EXPLORE"

PROFESSOR DR. ISMAIL BIN ABDUL RAHMAN
Deputy of Vice Chancellor (Academic and International)
Universiti Tun Hussein Onn Malaysia

Foreword from the Dean of Centre for Diploma Studies

Assalamualaikum Warahmatullahi Wabarakatuh and Warm Greetings

Congratulations and welcome to all of you that have made the right choice of taking the first step in joining Universiti Tun Hussein Onn Malaysia (UTHM) that is the 15th IPTA established in Malaysia. I wish to welcome all of you to the Centre for Diploma Studies (CeDS) which is always ready to support and train you to be a semi-professional in the field of engineering, science and technology.

As a center, we are responsible for running and operating the Diploma programmes at UTHM, CeDS has a clear vision and mission in developing and empowering all Diploma programmes offered. Currently, six (6) Diploma programmes being offered and the number of programmes will be increasing in the future in line with the country's employment needs. I believed you have chosen a suitable programme that suits your qualifications and dreams. Furthermore, the study period for all programmes is only 2 years and 9 months, the student will be completed their studies in a shorter time. In the meantime, Diploma graduates will be absorbed to continue to follow the Bachelor Degree programmes at UTHM with respect to the terms and conditions imposed.

In terms of infrastructure and teaching and learning facilities provided at UTHM have been recognized to fulfill the standard required accreditation bodies. In addition, the rapid development of the UTHM campus will now ensure the comfort of students with various facilities provided including libraries, residential colleges, cafeterias, sports activities, wireless internet connection, and various other amenities.

I hope that as a new student of the UTHM Diploma in UTHM, you will use this proforma as a guide and reference to facilitate you to plan and subsequently complete your diploma study program with excellence.

Wishing You Success.

ASSOCIATE PROFESOR DR. MOHAMAD ZAKY BIN NOH
Dean
Centre for Diploma Studies
Universiti Tun Hussein Onn Malaysia

Vision

Towards a world class university in engineering, science and technology for sustainable development

Mission

UTHM is committed to generate and disseminate knowledge, to meet the needs of industry and community and nurturing creative and innovative human capital, based on tauhidic paradigm

University Education Philosophy

The education and training in this university is a continuous effort to lead in the market oriented academic programmes. These programmes are student-focused and are conducted through experiential learning in order to produce well trained human resource and professionals who are catalysts for a sustainable development

University Logo

The logo of Universiti Tun Hussein Onn Malaysia (UTHM) is the pride, identity and idealism of the members of UTHM community. UTHM logo displays a Proton, Book, Tiered Mortar Board, Book Rest and Shield.

The whole concept of the logo symbolises UTHM as an Institution of Higher Learning which supports the growth and development of knowledge at all levels in fields of Science and Technology.

Blue represents a close-knit circle of members of UTHM community which ensures the success and enhancement of its educational and research programmes and activities for the benefits of mankind.

Red symbolises the courage of UTHM in the exploration of new fields as the pioneer in science and technology applications, which reflects the spirit and self-esteem of the members of UTHM community.

Symbolism:

Red	Courage
Blue	Co-operation/Loyalty
Silver	Quality/Prestige
Book Rest	Repository of knowledge
Proton	Science and technology
Book	Knowledge
Mortar board	Levels of study
Shield	Confidence

Centre for Diploma Studies

Centre Vision

Excellent in providing multidisciplinary education in science and technology

Centre Mission

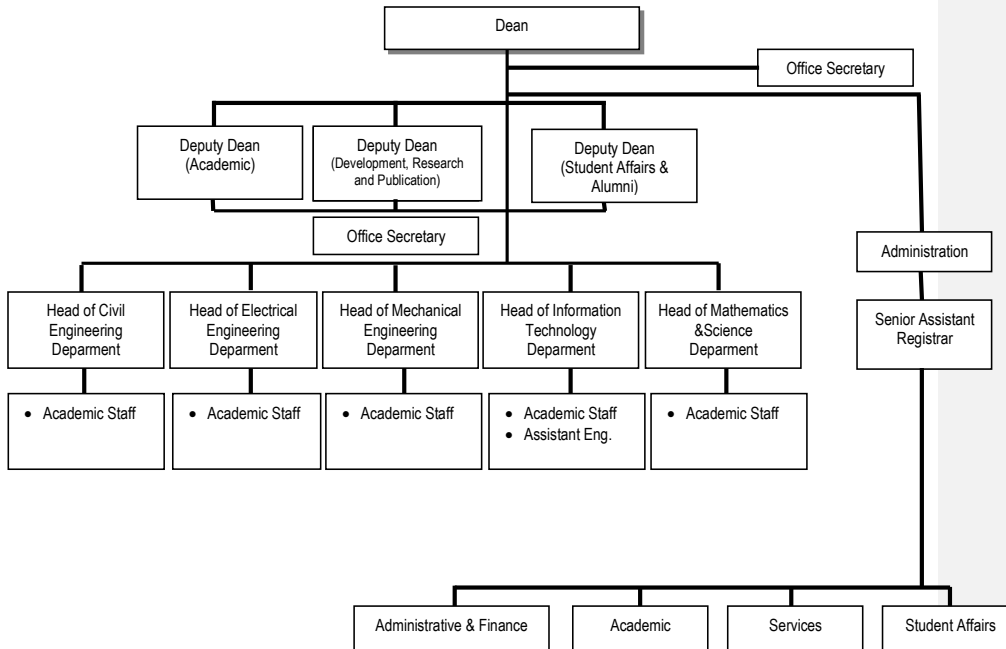

Producing graduates who contribute to national development through a holistic academic program

The diploma programmes had been offered in UTHM since the establishment of Pusat Latihan Staf Politeknik (PLSP) in 1994. At that time only three programmes were offered and were being managed by a few departments of concerned. All of the programmes were then assigned under the management of the respective faculties when Kolej Universiti Teknologi Tun Hussein Onn (KUITTHO) was established in the year 2001.

The establishment of the Centre for Diploma Studies was announced by the Vice Chancellor on the 1st August 2009. With the establishment of the Centre for Diploma Studies all of the diploma programme were able to be managed centrally thus increasing the competitiveness of all diploma programmes being offered by other higher education institutions in this country.

It is the aim of the Centre for Diploma Studies to boost the diploma programmes in UTHM to a level such that it becomes the main choice of applicants. With that all potential applicants are most welcome to join the diploma programme in UTHM. All of the diploma programmes in UTHM is being conducted according to the Outcome Based Education method since the July 2010 session. The diploma programmes offer the opportunities for graduates to further their studies in UTHM. The establishment of the Centre for Diploma Studies is intended to achieved equilibrium in the academic excellence, co-curriculum and the individual development of its graduate such that to achieved the quality needed to fulfill the global occupational market. Until now the Centre for Diploma Studies, have offered six (6) programmes which are being managed by the various departments.

The Centre for Diploma Studies consists of five (5) departments and is led by a Dean and is being assisted by three (3) Deputy Deans. The organizational chart of the Centre for Diploma Studies is as shown:

Programme Name

Diploma in Mechanical Engineering (DAM)

Programme Aims

To produce graduates who are more mature and competent to fulfill nation needs of skill and experts in the field of mechanical engineering whether in the public, private or self employed sector. The program also prepares students to further their studies to degree level at any university within or outside the country.

Programme Educational Objectives (PEO)

These are the PEOs for Diploma in Mechanical Engineering:

- PEO 1 Apply the theoretical, techniques, skills and practical knowledge to assist in solving real mechanical engineering problems.
- PEO 2 Solve mechanical engineering issues professionally and ethically in the society and environment.
- PEO 3 Communicate effectively with professionals and communities in solving the mechanical engineering issues.
- PEO 4 Practice management and entrepreneurship through long life learning in individual and organizational work.

Programme Learning Outcomes (PLO)

These are the PLOs for Diploma in Mechanical Engineering:

- PLO 1 Apply knowledge of mathematics, sciences, engineering fundamentals and engineering specialisation to mechanical engineering respectively in practical procedures and practices.
- PLO 2 Identify and analyze well-defined mechanical engineering problems reaching substantiated conclusions using codified methods of analysis specific to their field of activity.
- PLO 3 Design solutions for well-defined technical problems and assist with the design of systems, components or processes to meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations.
- PLO 4 Conduct investigations of well-defined problems, locate and search relevant codes and catalogues, conduct standard tests and measurements to provide valid conclusion.
- PLO 5 Apply appropriate techniques, resources, and modern engineering and IT tools to well defined engineering problems, with an understanding of the limitations.
- PLO 6 Demonstrate knowledge of the societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to engineering technician practice and solutions to well-defined engineering problems.
- PLO 7 Able to describe the impact of engineering solutions in societal and environmental contexts and demonstrate knowledge of and need for sustainable development.
- PLO 8 Demonstrate good ethics, responsibilities and norms of technician practices.
- PLO 9 Function effectively as an individual, and as a member or leader in diverse technical teams and in multi-disciplinary settings.
- PLO 10 Communicate effectively on well-defined engineering activities with the engineering community and with society at large, by being able to comprehend the work of others, document their own work, and give and receive clear instructions.
- PLO 11 Demonstrate knowledge and understanding of engineering management principles and apply these to one's own work, as a member or leader in a technical team and to manage projects in multidisciplinary environments.
- PLO 12 Recognize the need for, and have the preparation to engage in independent and life-long learning in the broadest context of technological change.

Synopsis of Courses

UQU 10403 Introduction to Nationhood and Development of Malaysia

Synopsis

This course discusses History and Politics, Malaysian Constitution, National Administrative System and Structure, Society and Unity, National Development as well as Religion and Beliefs. This course aims to produce graduates who have a national identity and a spirit of superior patriotism. Teaching and learning will be implemented in the form of lectures, assignments, examinations and learning experiences.

UQI 11502 Moral Studies

Synopsis

This course explains about the introduction to moral concepts, moral aspects and their importance in daily life. Western moral theory as well as the pure values of the great religions of the world. Morality in various fields of employment, ethics in science and technology and finally current moral issues.

UQI 11402 Philosophy and Current Issues

Synopsis

This course covers the relationship of philosophy with the Philosophy of National Education and Rukunegara. The use of philosophy as a tool to purify the culture of thought in life through art and thinking methods as well as human concepts. The main topics in philosophy namely epistemology, metaphysics and ethics are discussed in the context of current issues. Emphasis is given to philosophy as the basis for inter-cultural dialogue and fostering common values. At the end of this course, students will be able to see the disciplines of knowledge as a comprehensive body of knowledge and related to each other.

UHB 10302 English for Academic Survival

Synopsis

This course focuses on developing students' acquisition of English language skills required for higher education. This course assists students to read, write, listen and speak effectively and to become informed, literate and lifelong learners. By the end of the course, students should be able to use English for a wide range of personal and academic activities in the context of tertiary education.

UHB 20302 Academic Communication

Prerequisite Course: UHB 10302 English for Academic Survival

Synopsis

This course introduces students to critical reading and writing skills. Students are expected to read and respond critically to academic materials. This course will also provide opportunities for students to develop their academic writing skills in producing technical papers.

References

UHB 30502 English for Workplace

Prerequisite: UHB 20302 Academic Communication

Synopsis

This course employs a task-based learning approach and focuses on developing students' delivery of speech in oral interactions and job interviews. Particular emphasis will be given to promote the mastery of self-directed learning, team-work, research, reasoning and creativity. This course also enables students to acquire the knowledge skills necessary for conducting and participating in meetings, which include writing of meeting documents and event proposals based on specific themes. Students will also be exposed to interview techniques.

UWB 102 Foreign Language**

Synopsis

This course is designed for students to learn the basic Foreign language. Students are exposed to the skills of listening, reading, speaking, and writing with basic vocabulary, grammar and structure. Students are also exposed to the real daily situations which will help them to communicate using Foreign language.

UQ* 101 Co-Curriculum I**

Synopsis

The course offer various form of activities for student of Bachelor Degree and Diploma. Eight fields of activities offer are Public Speaking, Entrepreneurship, Sports, Community Services, Volunteership, Leadership, Culture and Innovation

UQ* 101 Co-Curriculum II**

Synopsis

The course offer various form of activities for student of Bachelor Degree and Diploma. Eight fields of activities offer are Public Speaking, Entrepreneurship, Sports, Community Services, Volunteership, Leadership, Culture and Innovation.

DAN 20103 Business and Entrepreneurship

Synopsis

This course aims nurturing an entrepreneurial culture among students and exposed them to the basics of entrepreneurial concept, entrepreneurial attributes as well as the development of creative and innovative skills that allow them to identify business opportunities and non-business. This course is designed to ensure students gain knowledge and skill related to fundamental of business and entrepreneurship such as introduction to entrepreneurship, business ownership, regulations and support services, business environment assessment, marketing plans, operational plans, financial planning and business management plans.

DAM 13003 Algebra

Synopsis

Algebra is the most basic of the higher mathematics disciplines. Without the fundamentals taught in algebra, it is virtually impossible to deal with geometry, trigonometry or statistics.

DAM 13102 Chemistry

Synopsis

This course introduces students to chemistry knowledge needed in the engineering and technology field. The topics discussed are Atomic Concept and Mole, Electronic Structure of Atom, Periodic Table of Elements, Chemical Bondings, Gas Laws, Thermochemistry, Chemical Kinetics, Chemical Equilibrium, Acid-Base and Electrochemistry.

References

DAM 13202 Physics

Synopsis

This course introduces students to mechanic physics knowledge needed related to linear motion and angular motion. The application involves the concept of SI units, vector, position, distance, displacement, speed, velocity, mass, weight, momentum and acceleration into force, work, energy, power and SHM. The courses also discuss Newton's Law and dynamics motion of body on horizontal and incline planed.

DAM 13303 Engineering Mathematics

Synopsis

This course explains in detail topics related to calculus. The first topic is function. It includes a description of the relationship and functions, sketching graphs of algebraic functions and piecewise function and determination of range and domain. The second topic describes the limit of a function, one-sided limit, limit at infinity and continuity. Further topics include the differentiation techniques as well as the application. It includes chain rule, differential of the exponential function, logarithms, implicit, parametric, and higher derivatives. Then the topic followed by integration as the inverse of differentiation. The techniques used are the method of substitution, by parts and partial fractions. This topic also includes the application of integration such as area (and surface area) and volume of bounded region. Finally, the topic of first order differentiation and its application was introduced. It contains a four type of equation (separable, linear, homogenous and exact) to be solve and lastly the application related such as Newton's law of cooling and growth-decay problem.

DAM 13503 Basic Electrical and Electronics

Synopsis

This course is designed to provide the basics of electrical and electronic, such as atomic structure, resistance, conductance, color codes, Ohm's law, power and energy, series circuits, parallel, series-parallel resistive, Kirchoff's laws, the magnetic field, magnetic force, intensity, permeability, magnetic circuits, hysteresis, the law of Faraday, Fleming, and Lenz, self and mutual inductance, charge, electric flux, capacitance, voltage alternating current, phase diagram, resonant circuits, single phase transformer, ideal, arrangements, the efficiency, semiconductor devices: diodes, zener diodes, rectifiers, transistors bi-polar and field effect transistors.

DAM 13803 Technical Drawing & CAD

Synopsis

This course provides the student with the skill to produce technical drawing using the following drafting skills i.e. manual lettering, technical drafting, basic geometric construction, single and multi-view drawings, scale measurement and the reading of technical drawings through drawings and related assignment. Students will also learn to develop their skill with the use of AutoCAD software.

DAM 23702 Industrial Engineering

Synopsis

Introduction and history of industrial engineering, the basic concepts of statistics, study methods, concurrent engineering, work measurement, facilities planning and design, ergonomics, inventory control, production control, Material Resources Planning (MRP), Just In Time (JIT), Supply Chain Management.

DAM 23803 Mechanics of Machine

Synopsis

Introduction to gear system, belts, wheel balancing energy, friction and wear, mechanism, introduction to vibration and damped vibration.

DAM 23903 Fluid Mechanics

Synopsis

This course will cover the Basic Principles of Fluid Mechanics, Hydrostatic Pressure and Buoyancy, Continuity Equation, Bernoulli Equation, Momentum Equation, Fluid Flow in Pipes, Dimensional Analysis and Similarity

DAM 24101 Engineering Project I

Prerequisite Course: Acquired 40% of total credit requirement for Diploma graduation

Synopsis

Engineering Project is the knowledge used for the training of academic systems, skills, engineering concepts and problem solving techniques. This project involves (1) reviewing phenomena / processes / systems, (2) design / construction of components / products, (3) software development or (4) case studies. The project is also taken from industry or laboratory basis. The Engineering Project is divided into two sections: (1) Engineering Project I and (2) Engineering Project II. The Engineering Project I is a prerequisite to the Engineering Project II.

DAM 24103 Engineering Project II

Prerequisite Course: DAM 24101 Engineering Project I

Synopsis

Students are required to create and implement one project for this semester. This project basically focuses on identification, problem solving, method or approach to a system being studied. The project focused on areas of problem solving, project planning, innovative design, analysis and testing. This engineering projects are primarily industrial-based in the field of mechanical and manufacturing engineering which include the aspects of product development, fabrication and testing. The project is to realize the understanding gained from the theory by using the principles or concepts. This projects will shape students who are proficient in socializing with the creation of partnerships and individuals or co-operatives, proficient in applying and selecting solutions and proficiency in applications. It also serves as a training in teamwork. Students are also required to present proposals and project progress reports in seminars held at the end of the semester.

DAM 33012 Industrial Training

Prerequisite Course: Acquired 60% of total credit requirement for Diploma graduation

Synopsis

Students are required to undergo industrial training in mechanical engineering field for 24 weeks. They will undergo training to be set by the industry as planning, management, design, evaluation, project supervision and etc.

Career and Further Education Prospect

Assistant Mechanical Engineer or technologist is involved with the machine design, machines troubleshooting and any of a huge range of projects in mechanical engineering.

Their role is central to ensuring the safe, timely and well-resourced completion of projects in many areas, including:

- Process Industry;
- Assembly Industry;
- Engineering consultancy;
- Heavy Industry.

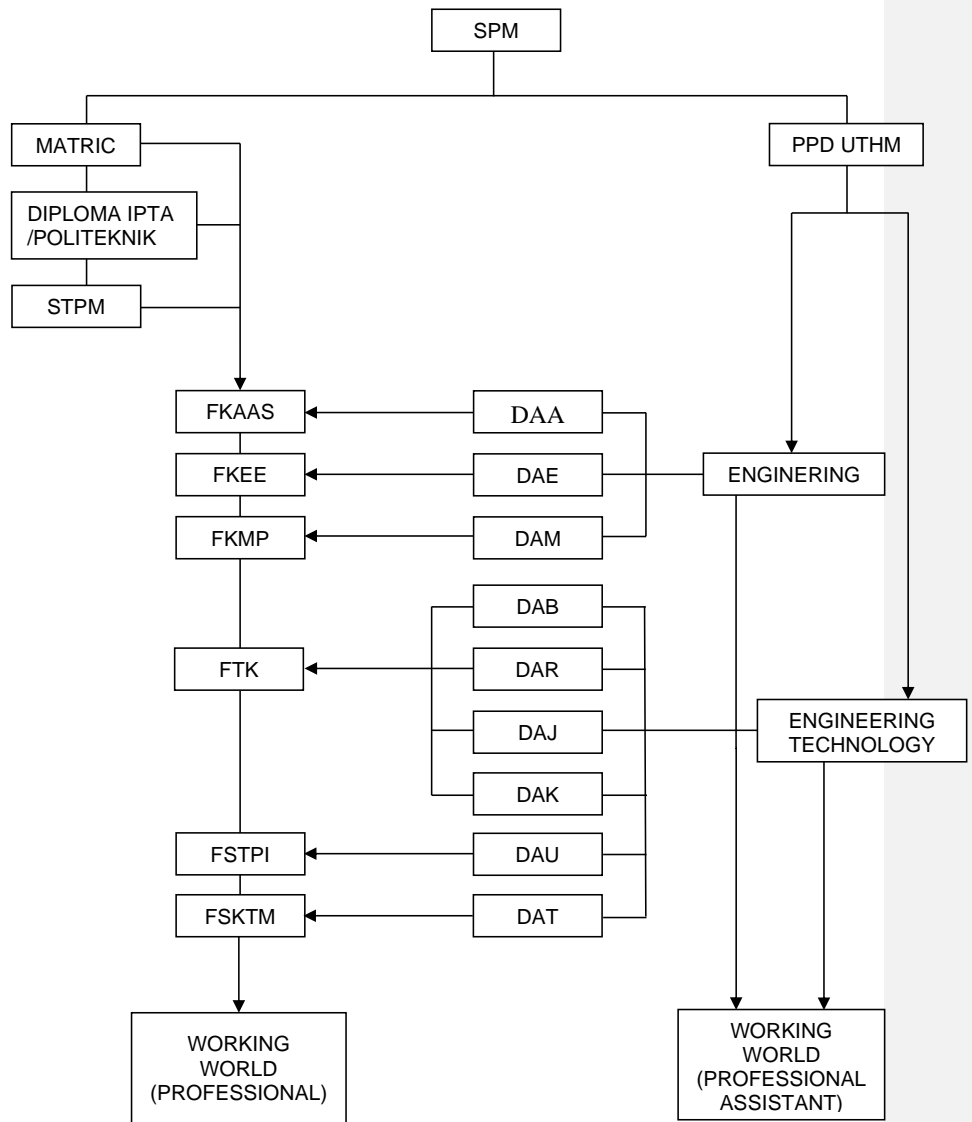

Assistant of consulting mechanical engineers liaise with clients to plan, manage, design and supervise the mechanical of projects.

Mechanical engineering offers many opportunities as well as the satisfaction of helping to improve and enhance public quality of life in many settings.

Further education is propect to any bachelor degree in technology mechanical engineering and mechanical engineering.

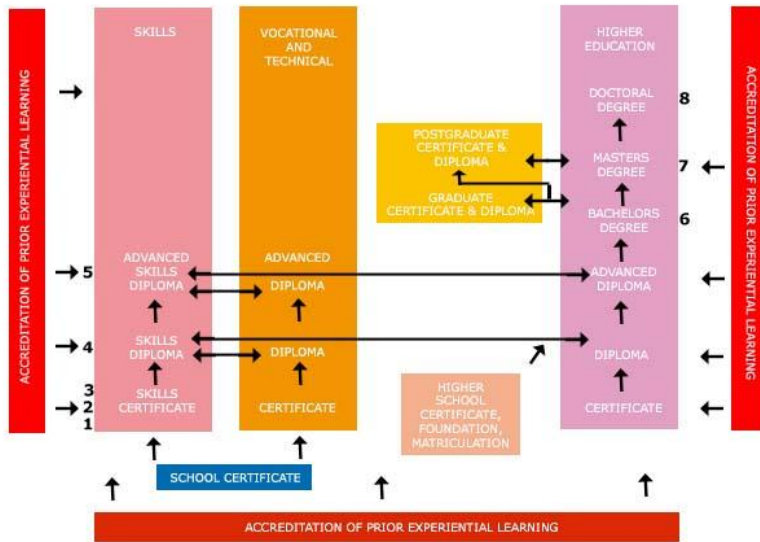

Figures below show examples of jobs and career pathway in Centre of Diploma Studies UTHM and according to Malaysian Qualification Framework

Legend:
 DAA – Diploma in Civil Engineering
 DAB – Diploma in Civil Engineering Technology
 DAE – Diploma in Electrical Engineering
 DAR – Diploma in Electrical Engineering Technology
 DAM – Diploma in Mechanical Engineering
 DAJ – Diploma in Mechanical Engineering Technology
 DAT – Diploma in Information Technology
 DAK – Diploma in Chemical Engineering Technology
 DAU – Diploma in Applied Sciences
